

GEKA plus Claw Couplings for Drinking Water Applications

The GEKA plus claw couplings made of forged brass are the perfect all-rounders for drinking water applications.

These products are approved according to DIN 50930/6 and DIN 17660. Moreover, these claw couplings have a patented high-performance rubber ring made of NBR with excellent elastic properties as well as a KTW approval according to D2 and long-term test result DVGW W270.

DVGW
tested and
approved

Advantages:

- Easy to couple
- High pressure and vacuum range, reduced tilting moment
- Maximum passage through perfect wall thickness
- Safe and hose-friendly hose barbs
- Ergonomically formed claws, safety notches against accidental loosening
- Different sizes and connection types

Easy Handling - Safe and Firm Grip

GEKA plus claw couplings are connected the same way as WaterProfi by **LUDECKE**® claw couplings. Push the two couplings together at 180° degrees opposite to each other until the seal faces touch. Afterwards, rotate one coupling half as far as it will go into the opposite direction of the other - the couplings lock into place.
