

■ Swivel flange coupling

Galvanized steel

Stainless steel AISI 316 / 1.4401

Polypropylene available on request

■ Flange gasket

- novatec® PREMIUM II, RF for flanges complying with EN / DIN / ANSI
- GORE™ Universal Pipe Seal (UPG) Style 800, RF for flanges complying with EN / DIN / ANSI

Raised-face flange gaskets are used in applications where the gasket is seated directly on the contact face of the flange, between the flange holes.

- GORE™ Universal Pipe Seal (UPG) Style 800 is 100% expanded PTFE. Their multidirectional fibre structure and unique (envelope) profile enables GORE™ UPG Style 800 gaskets to be used in a wide range of chemical industry applications.

Features:

- chemically inert and temperature resistant
- seals at low bolt loadings
- high dimensional stability
- high resistance to creep and cold flow
- seals all types of standard piping
- resistant to all media in the 0-14 pH range, with the exception of alkalis and fluorine, particularly at high temperatures and pressures
- temperature range: -210°C / -346°F up to 260 °C / 500°F
- dimensions comply with EN-DIN and ANSI

- novatec® PREMIUM II is a flange seal for general and chemical industry applications. The combination of graphite, paramide fibres (KEVLAR®) and low binder content, allows the flange gasket to be resistant to 80% of all common chemical industry media.

Features:

- good stress relief
- resistant to high temperatures
- good ductility
- non-stick coating
- excellent torque retention
- temperature : 320°C / 608°F
- resistant to a wide range of chemicals and steam applications
- dimensions comply with EN-DIN and ANSI

novatec® PREMIUM II is a registered trademark of Frenzelit

KEVLAR® is a registered trademark of Dupont Dow Elastomers

GORE™ Universal Pipe Seal Style 800 is a registered trademark of W.L. Gore & Associates, Inc.

ASSEMBLY

RK and RKP safety clamps in compliance with EN 14420-3 / DIN 2817

FLEXOLINE® safety clamps

HRRK swage ferrules

HRP swage ferrules

Worm drive, band or bolted clamps
