Santa Perpetua Moguda, October 4th 2012

Dear Sirs

The Spanish Quality certification entity, AENOR, certifies that our organization Espiroflex fulfils the requirements of the quality norm ISO 9001:2008 for the design and manufacturing of flexible pipes in plastic and aluminium.

All our products are manufacturing according with this quality system management norm, and also with the international quality norm that applies for each product, that in the case of our "Extraflex" hoses are:

- **NF P92 503 Sécurité contre l'incendie - Bâtiment - Essais de réaction au feu des matériaux - Essai au brûleur électrique applicable aux matériaux souples.**
- **UL 94 Test for Flammability of Plastic Materials for Parts in Devices and Appliances**

The classification of our product according with the first Quality Norm is M2, and regarding the second one is H-B

We appreciate the confidence you place in our products and I remain at your disposal for further questions or comments

Yours faithfully

Javier Narváez

Quality Manager
