SUBJECT: R490 and B571

PA Elastomer Laminates hereby certifies that our fluoroelastomers ref. R490 and B571 are silicone free.

Nevertheless, in the case of R490, for articles from 5 mm thickness and over, due to production process it may have some trace of silicone on the surface (highly diluted).

In our production for B571 (food grade), we do not use silicone.
